

## CLAIMS

1. A cosmetic applicator, comprising:  
a brush (7) consisting of a plurality of bristles (8);  
5 a fixing portion (6) with a hole (5) formed at one end thereof so that the brush (7) is  
inserted into the hole; and  
a rod (4) coupled to the fixing portion (6) to support the fixing portion (6),  
wherein the fixing portion (6) is made of a plastic material and formed to be flat through  
a pressing process, thereby securing the brush (7) inserted into the hole (5) in a flattened  
10 shape.
2. The cosmetic applicator as claimed in claim 1, wherein the rod (4) is made of  
plastic synthetic resin, and the fixing portion (6) is formed integrally with an end of the  
rod (4).
